

MYMADDER

Mymadder, Movement and Creation, was founded in 2012 in Madrid. The company originates from the collaboration between two independent choreographers: Manuel Martín (Madrid) and Rebeca García Celdrán (Santander). Their creations have been presented in dance and street theatre competitions and festivals such as Gracias x Favor, Miradas al Cuerpo, DeUnaPieza, TAC de Valladolid, Feedback Festival and Festival Coreógrafos en Comunidad.

In 2013 they were runners-up of the Choreographic Contest of Madrid and obtained a residency at La Caldera. In 2014 Mymadder moved their artistic residence to Cantabria, where they develop projects to establish links between contemporary creation in Madrid and Santander. Since 2016 they have obtained different awards that have allowed them to broaden their horizons and create in different European locations (they will be in Sardinia soon).

Experience: Calder Stories

This experience proposes a visit to the exhibition *Calder Stories* during which each participant will experience, individually and as a group, the artist's work hand in hand with the dancers Manuel Martín and Rebeca García Celdrán (Mymadder). Dance and sculpture will join in time and space to activate our emotions and to create movements that will make us experience the exhibition from a new perspective.

The scenic arts company Mymadder will accompany the group throughout the visit helping each visitor decide how to relate with the space and with Calder's work through their body. Applying different dynamics performed live by the dancers, who will use their body as a means of transmitting ideas, the public will unravel the concepts that the artist dealt with in his work. The group's connection will enable us to go deeper into the exhibition and to become another piece of the whole structure.
